Question 1

a = 6, b = 9, c = 14, and flag = 1

(1) c == a + b ||! flag

14 == 6+9 || !1

Ans=0 this is not evaluated due to short circuit method

(2) a! = 7 && flag || c >= 6

6! = 7 && 1 || 14>=6

Ans= 1 this is not evaluated due to short circuit method

(3) ! (b <= 12) && a % 2 == 0

! (9 <= 12) && 6 % 2 == 0

Ans= 0 this is not evaluated due to short circuit method

(4) ! (a > 5 || c < a + b)

! (6 > 5 || 14 < 6+9)

Ans=0 this is not evaluated due to short circuit method
